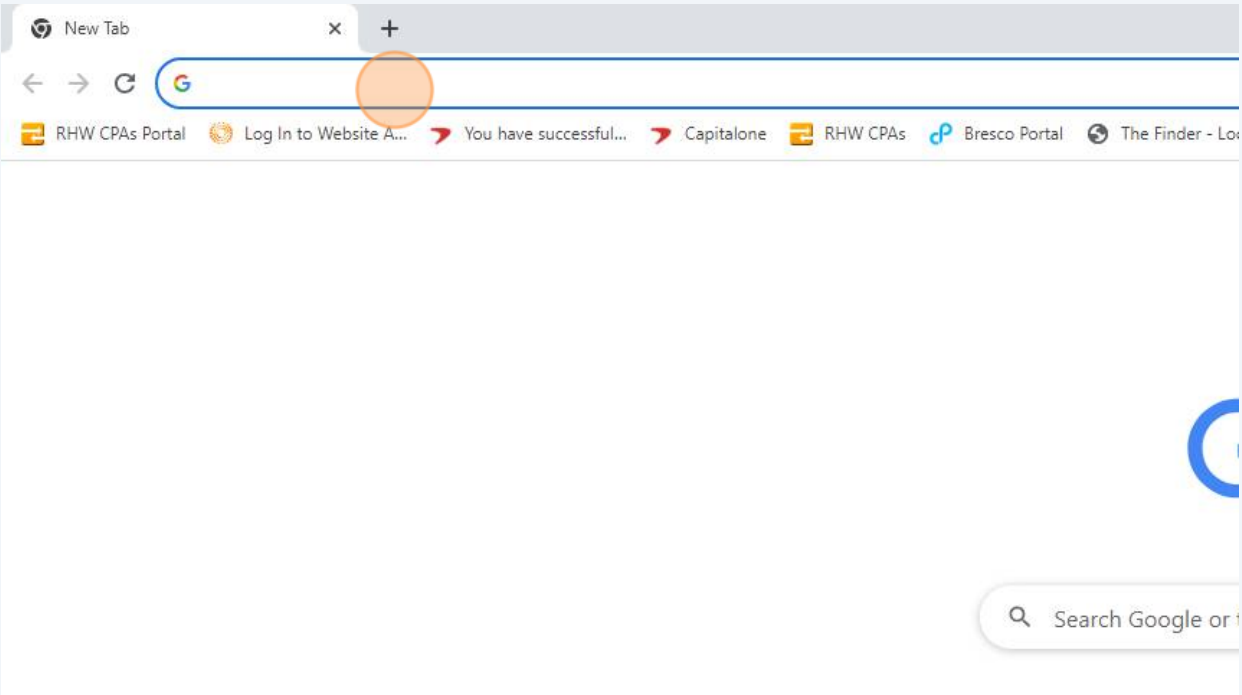
Step-by-Step Guide: Accessing a Website and Entering Login Credentials in Google Chrome

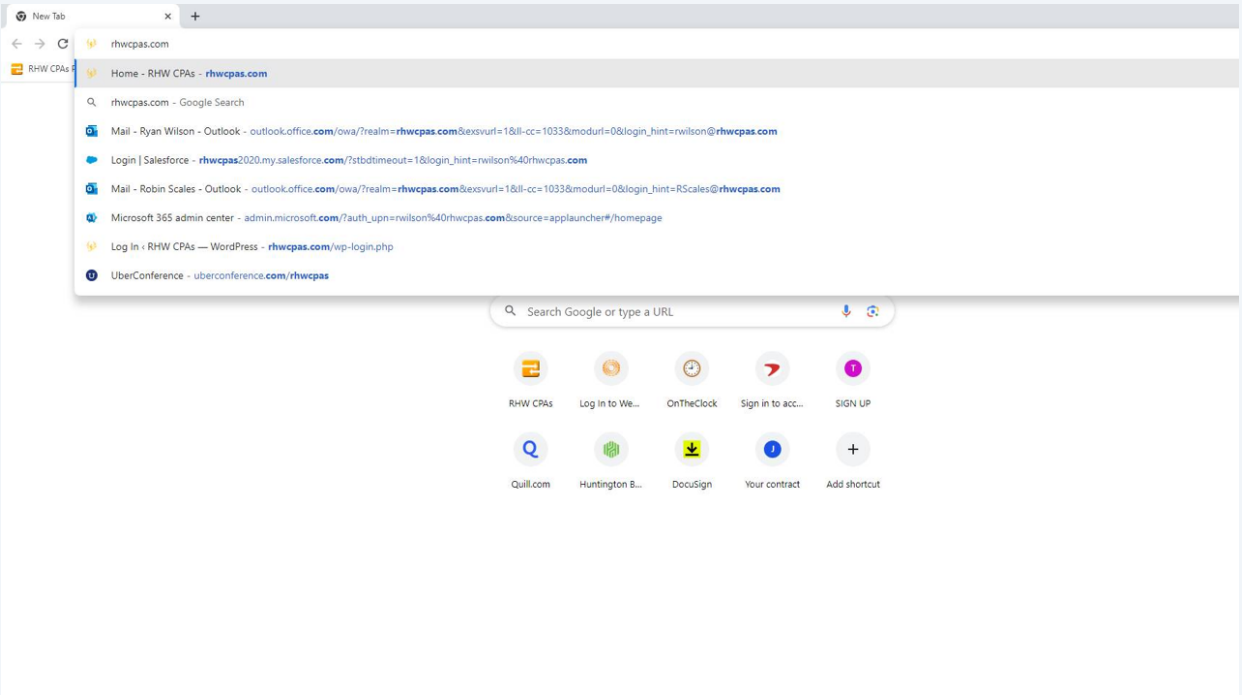
Call the office so that an Admin can generate a temporary 24 hour access code.

1 Click "Google Chrome"

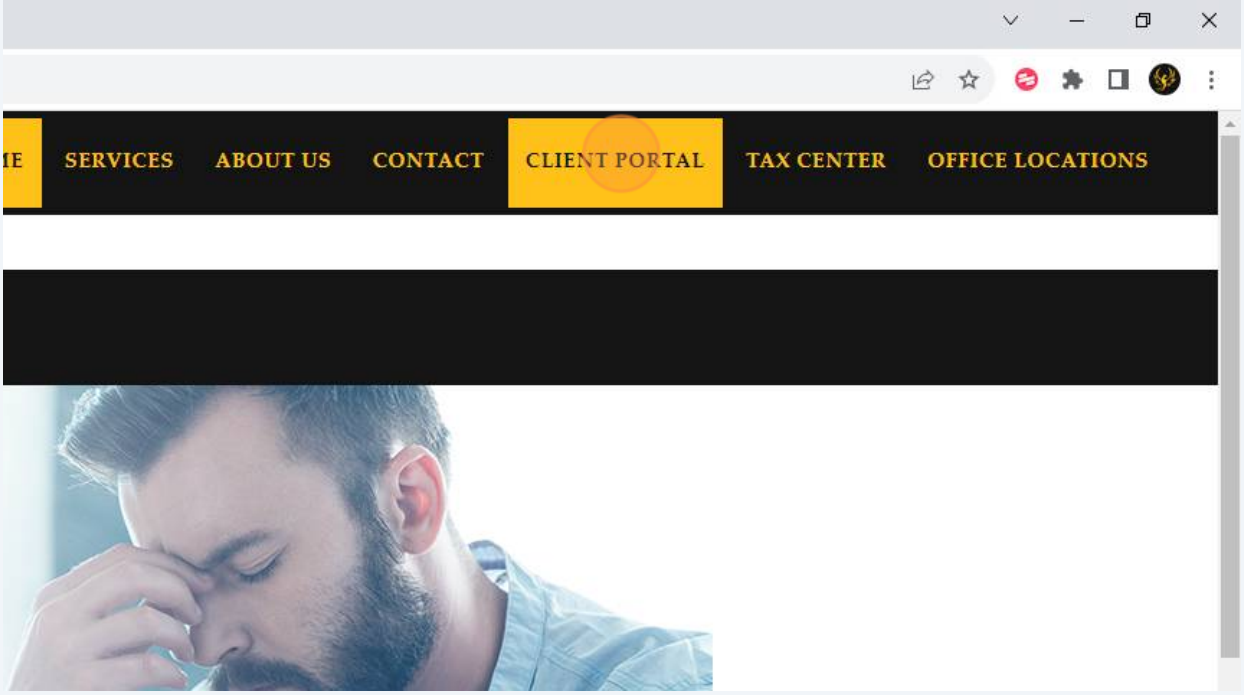
2 Click here:



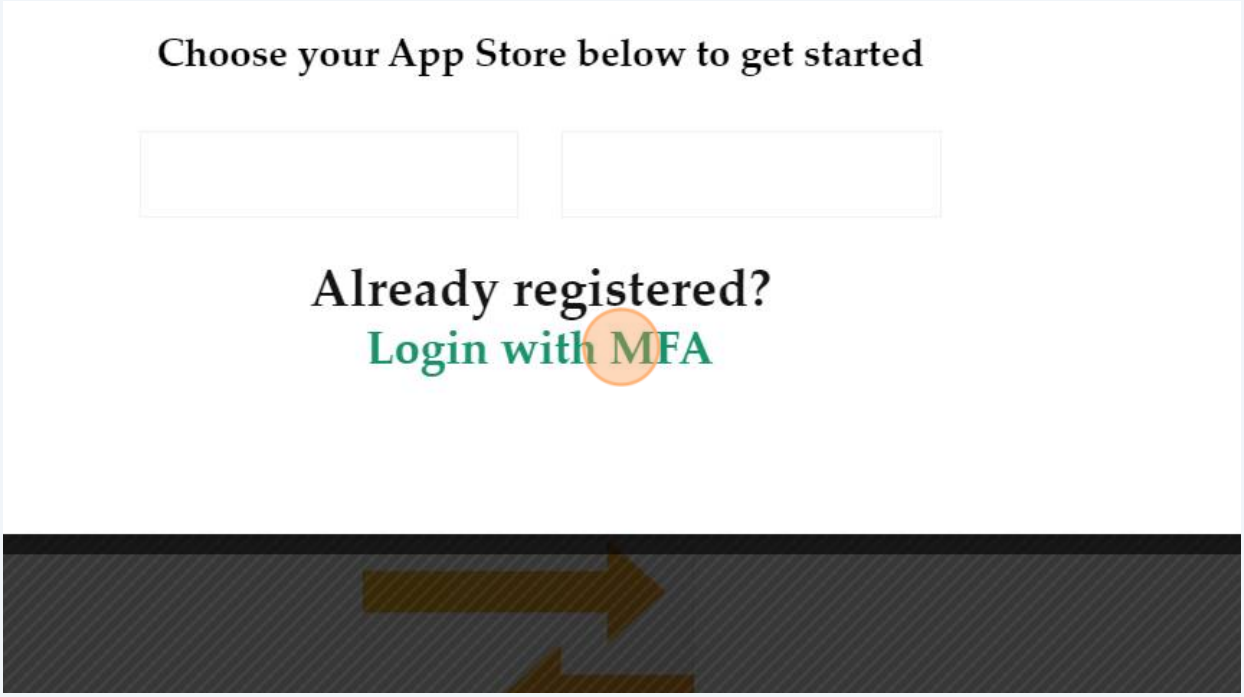
3 Type "rhwcpas.com in the web address car. Hit**enter** on your keyboard"



4 Click "Client Portal"

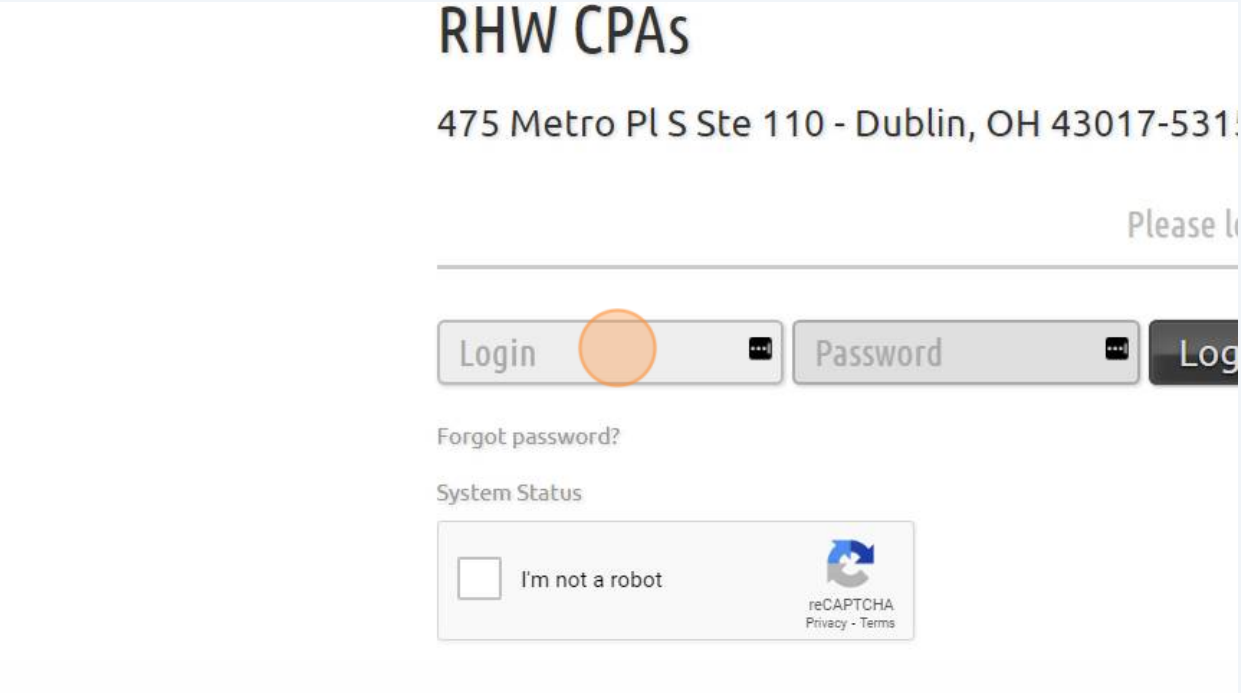


5 If you already have your Multi Factor Authenticator on your Phone, Click "Login with MFA"

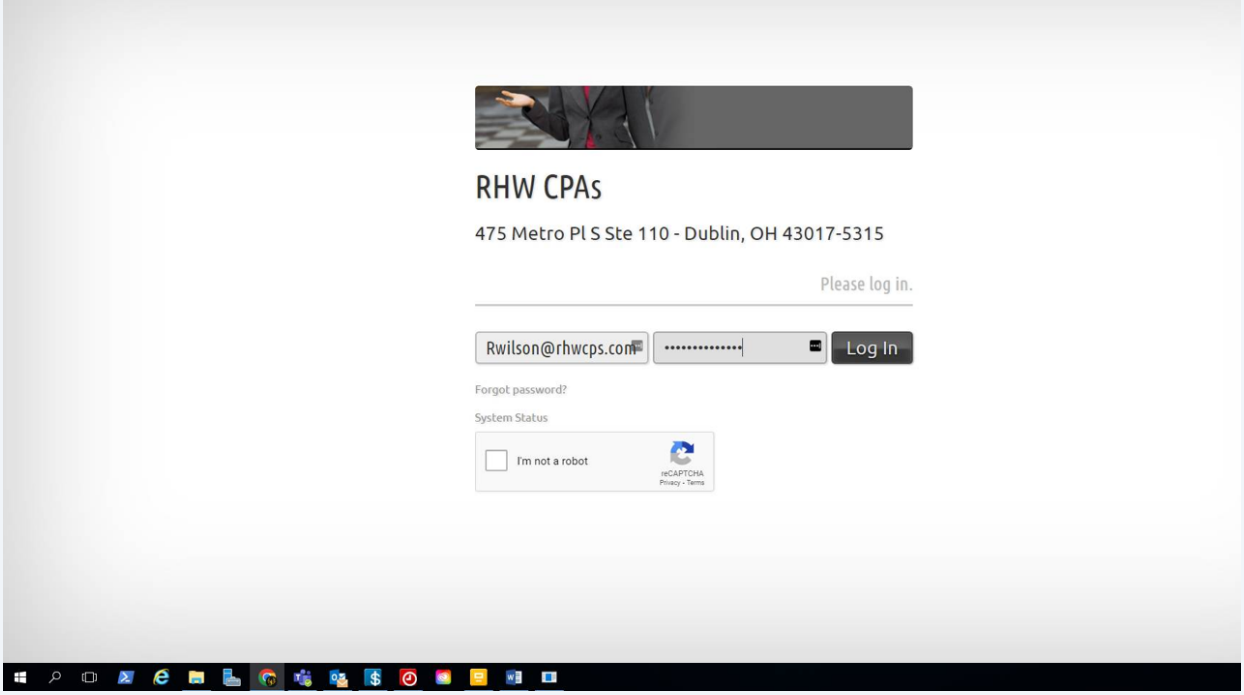


6 Type " **delete**"

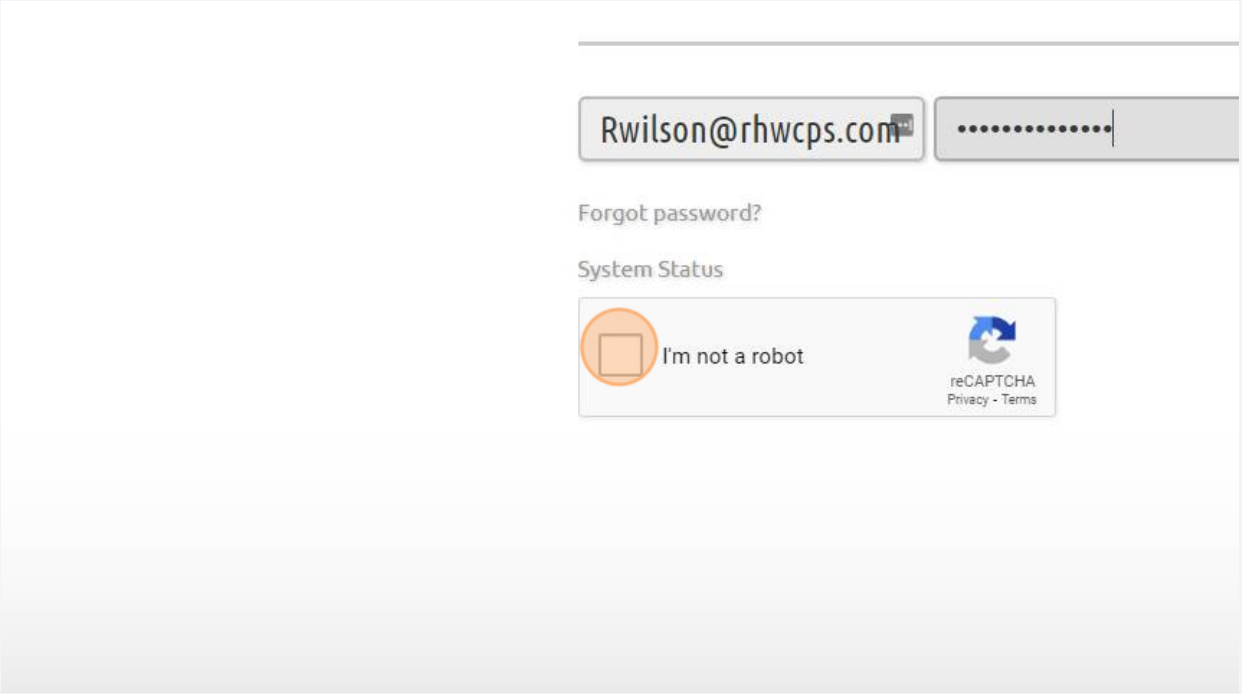
7 Type in Your Client Portal User Name/Login.



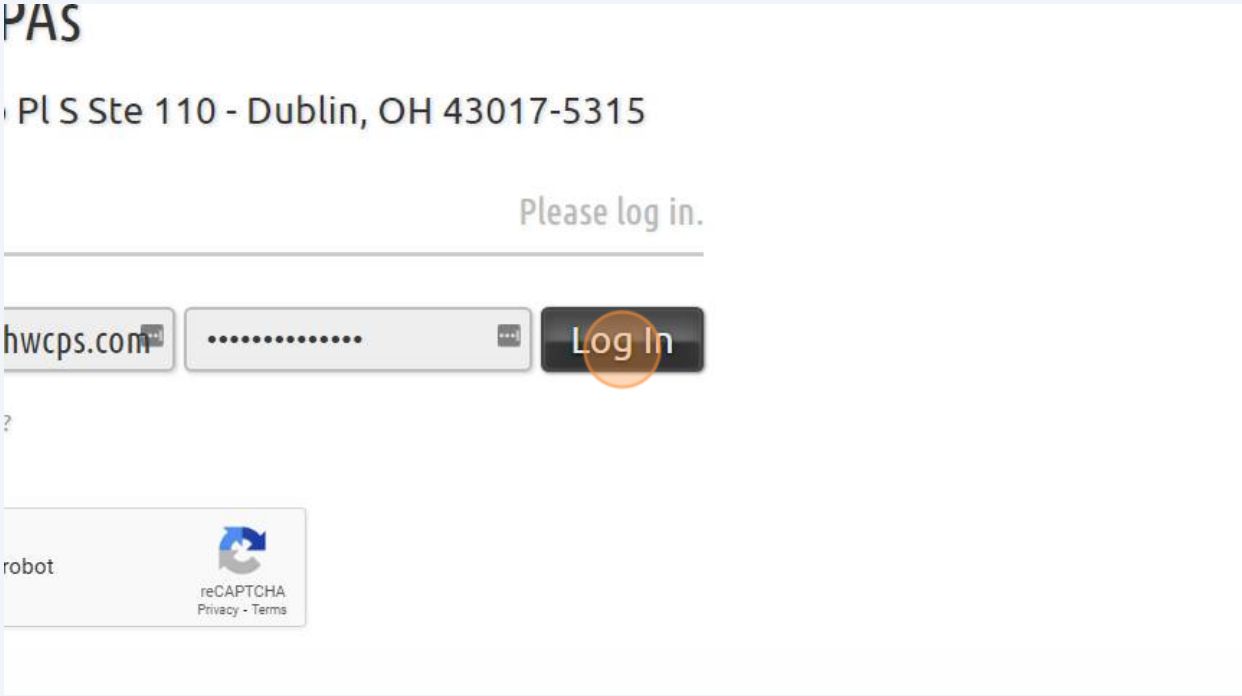
8 Type in your Password. If you have forgotten your password, Click "Forgot Password?"



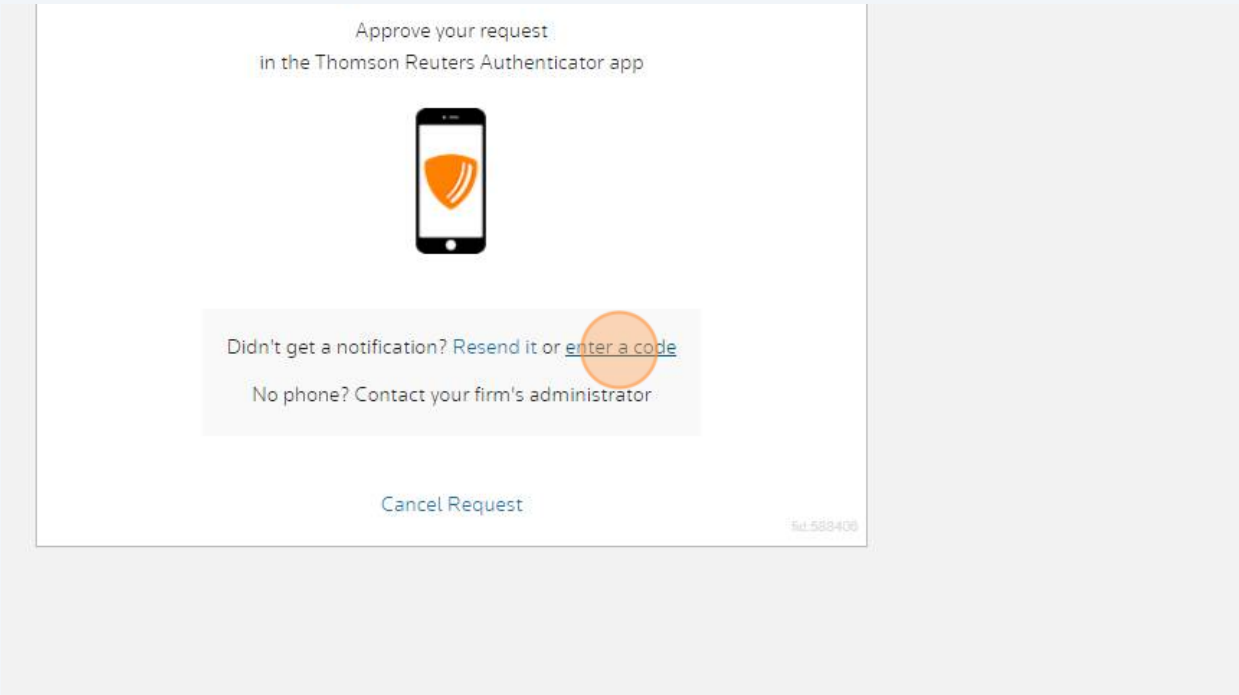
9 Click "I'm not a robot"



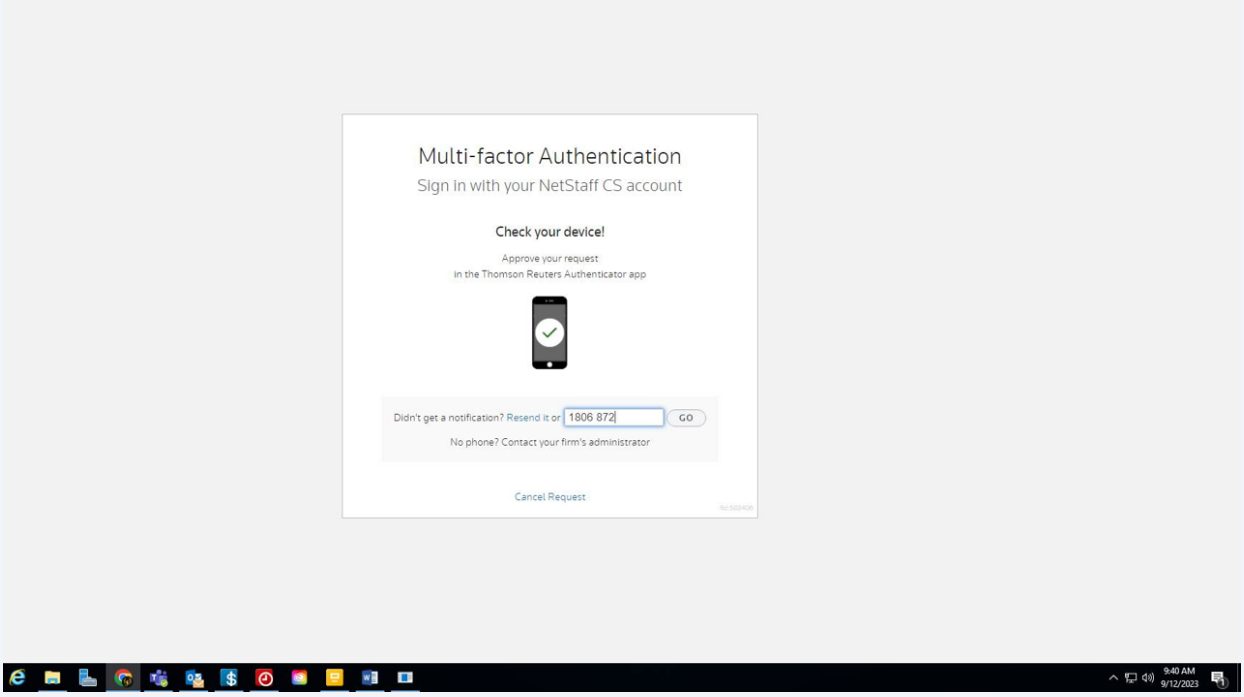
10 Click "Log In"



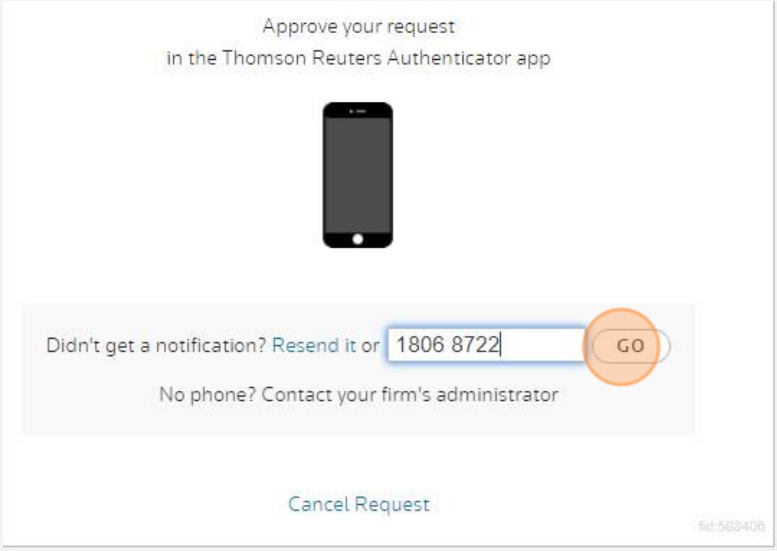
11 Click "Enter a code"



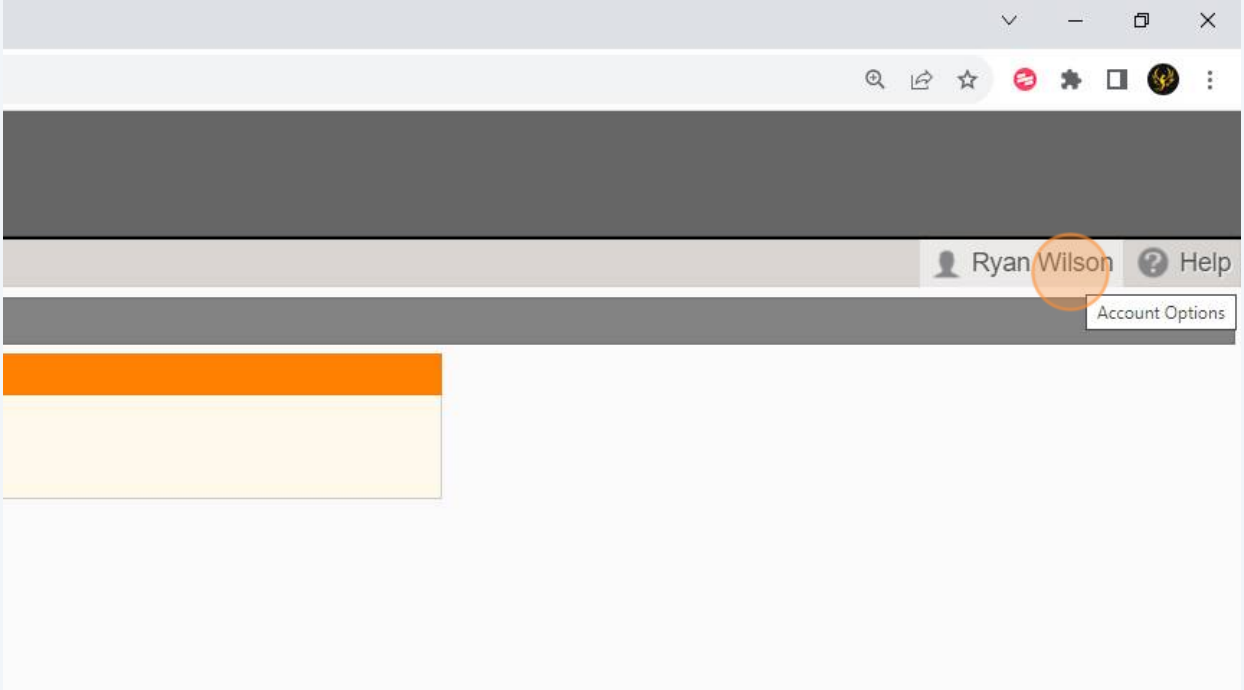
12 Type in the Special eight (8) digit Temporary 24 hour code provided to you by our office. Make sure there is a space between the first four (4) digits and the last four (4).



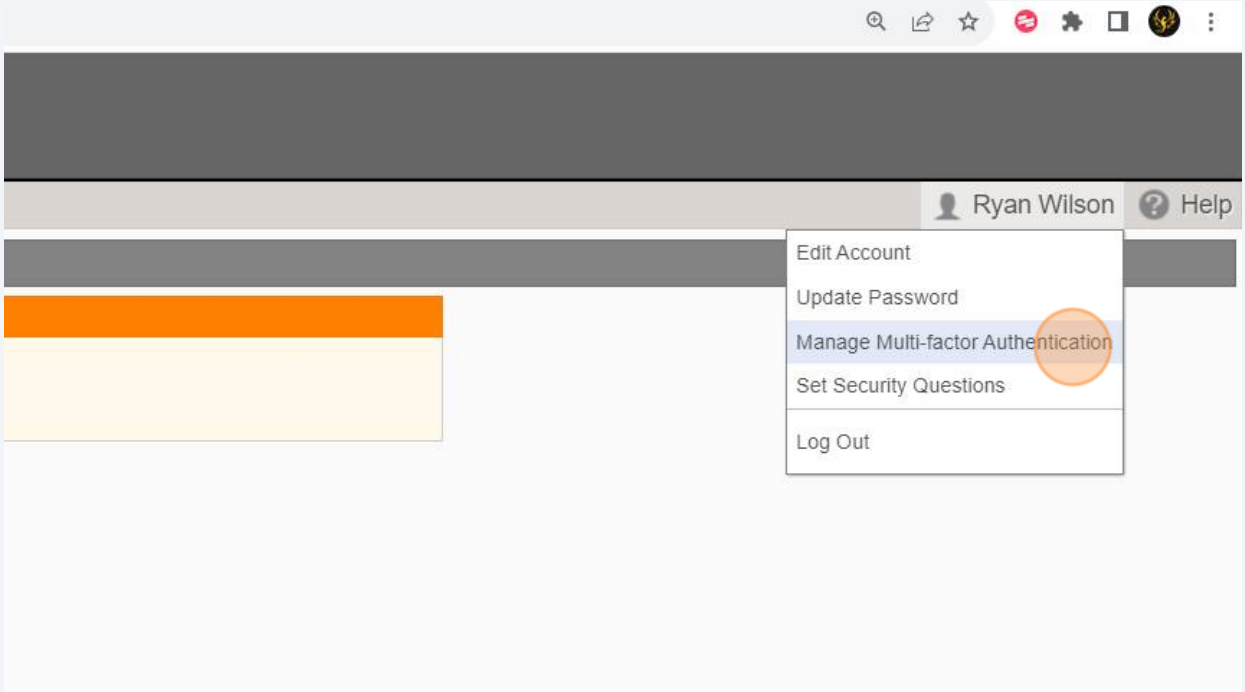
13 Click "Go"



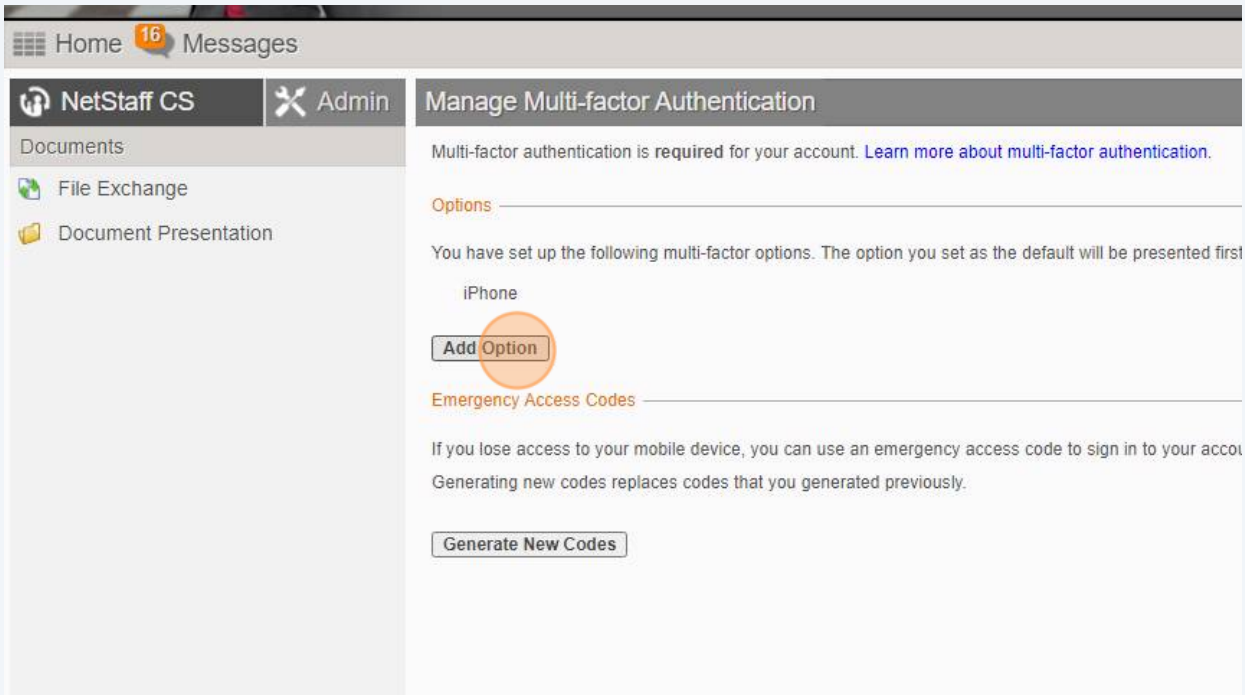
14 You should now be logged into your client portal. Click on your name in the upper right side of your computer screen.



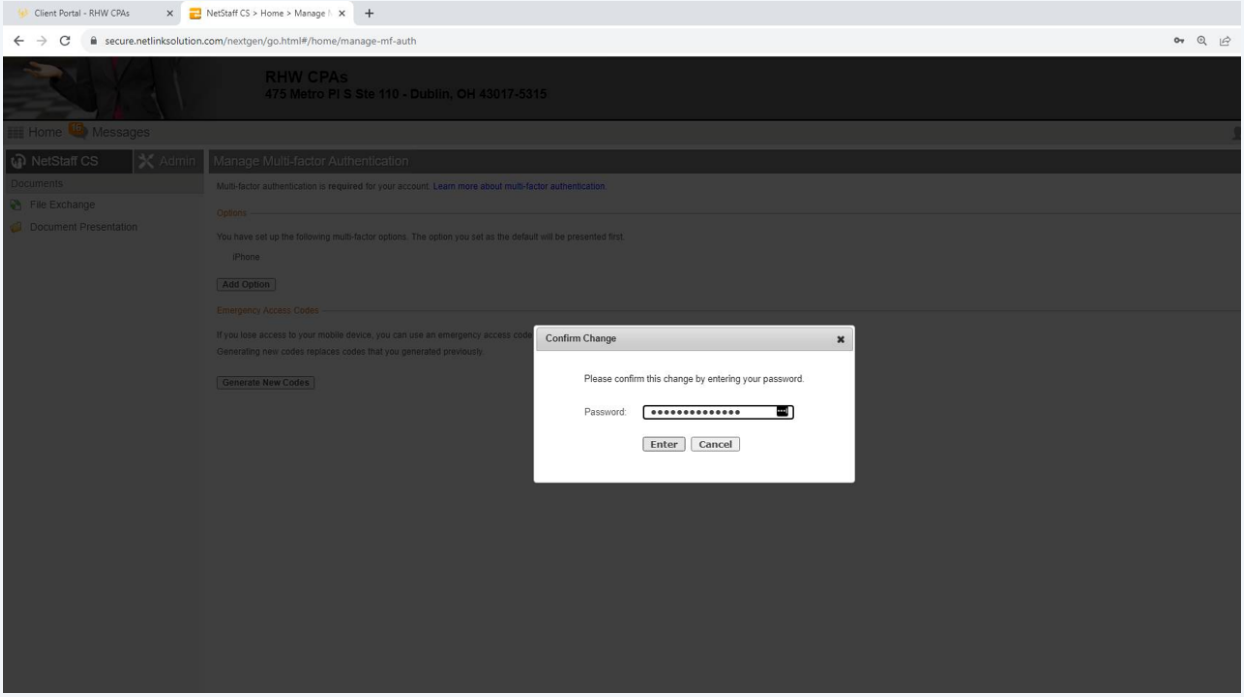
15 Click "Manage Multi-factor Authentication"



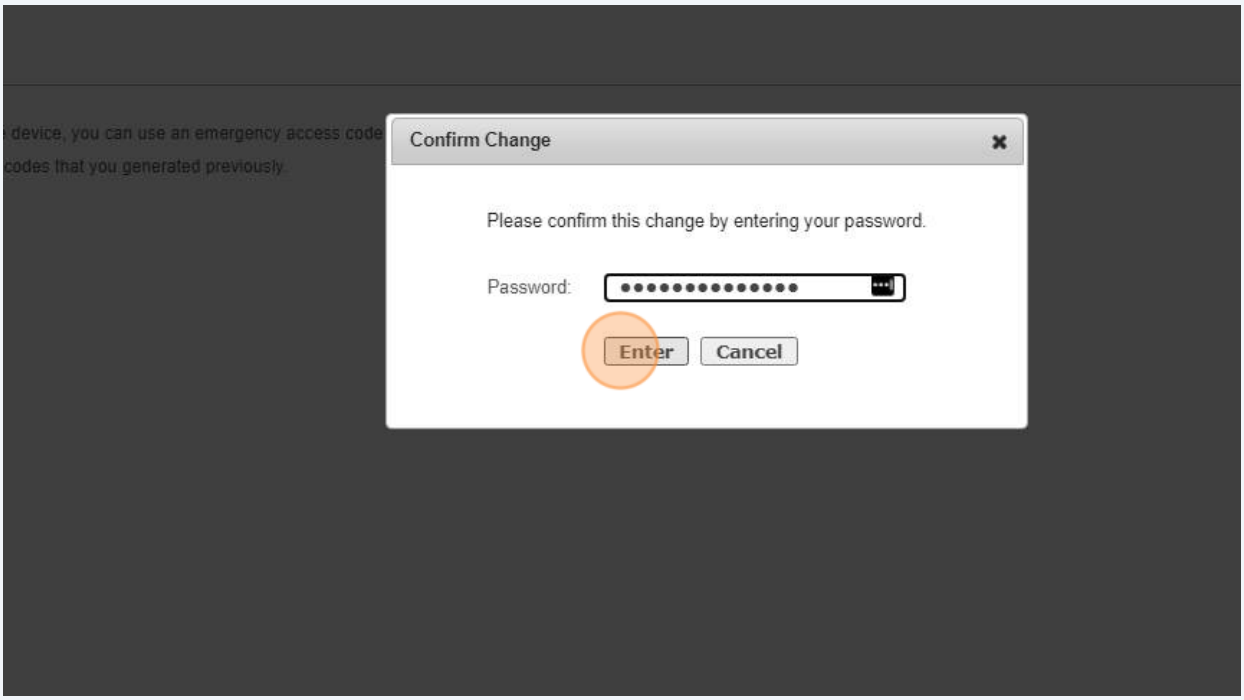
16 Click "Add Option"



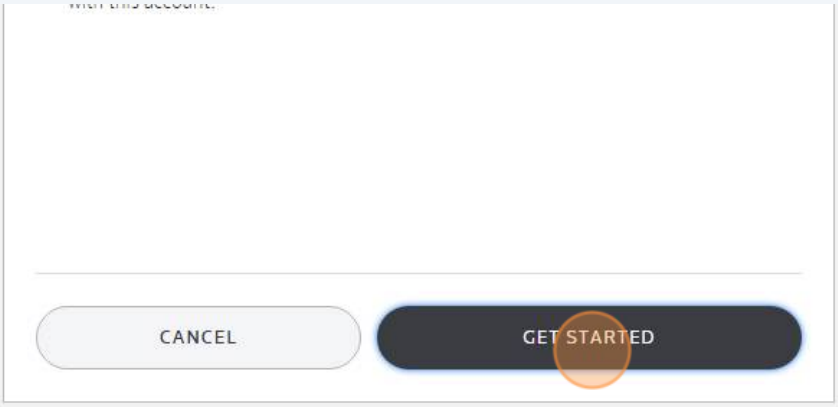
17 Type in your Client Portal password.



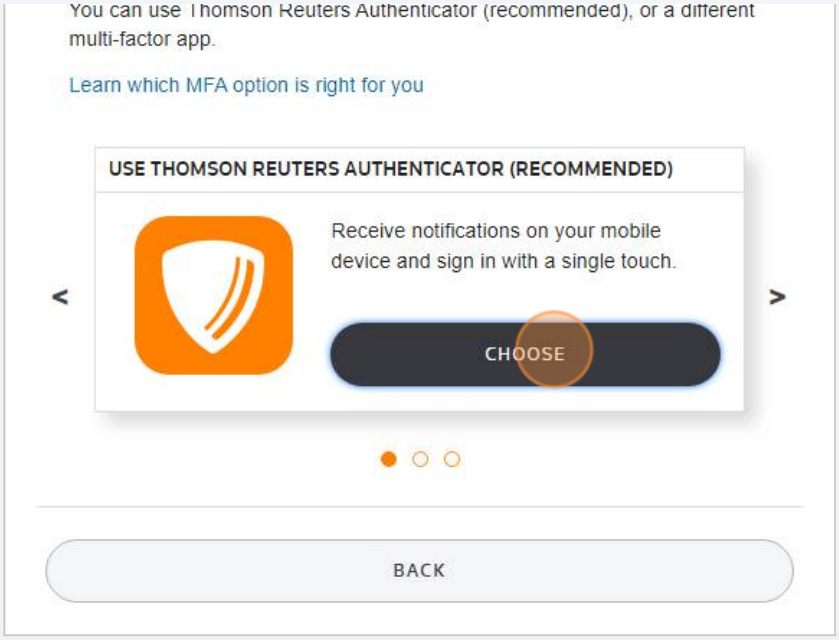
18 Click "Enter"



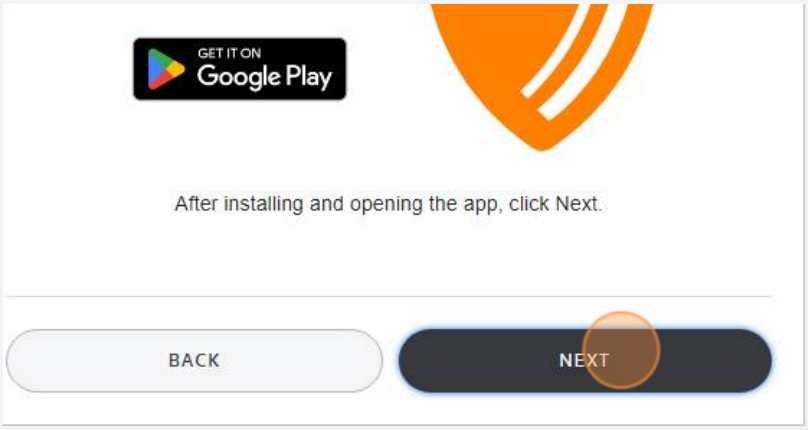
19 Follow the Set-up Wizard to connect your device to your client portal.
Click "Get Started"



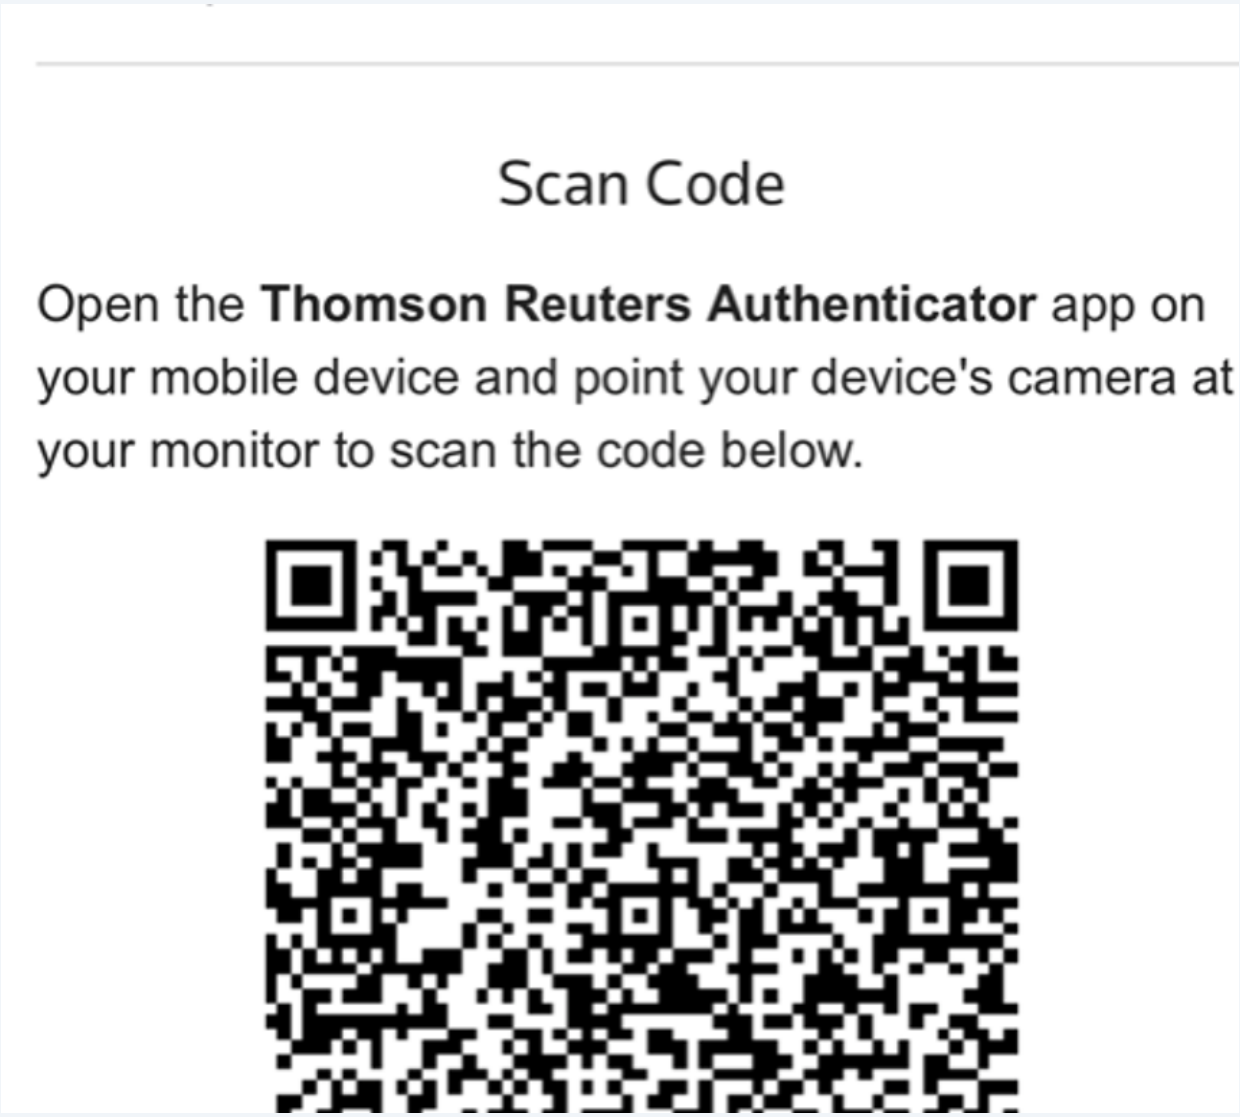
20 Click "Choose" for Thomson Reuters Authenticator



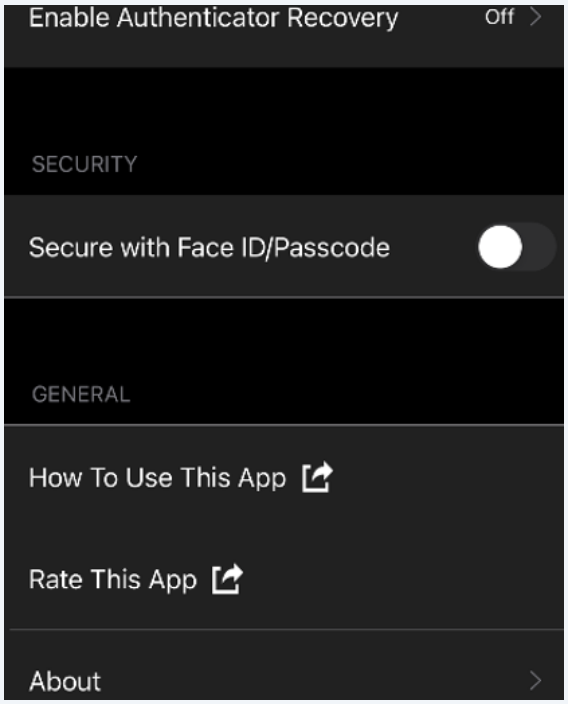
21 Click "Next". A QR code will appear on your desktop computer.

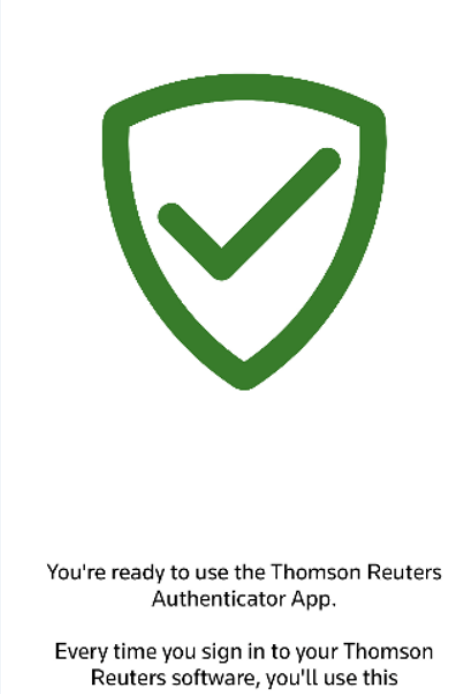


22 With your phone camera via the Thomson Reuters Multi-Factor Authenticator app, Scan the QR code.



23 To scan the QR code, click on the settings icon in the Multi-factor Authenticator. Click "Scan QR Code"
The camera on your phone should open within the app. Hold the camera up to the QR code. It will scan automatically.





24 If successfully paired, you will see the "Pairing Successful!"
