Ultimately, it saves time and reduces errors in client engagement management.

1 Log into Docusign:

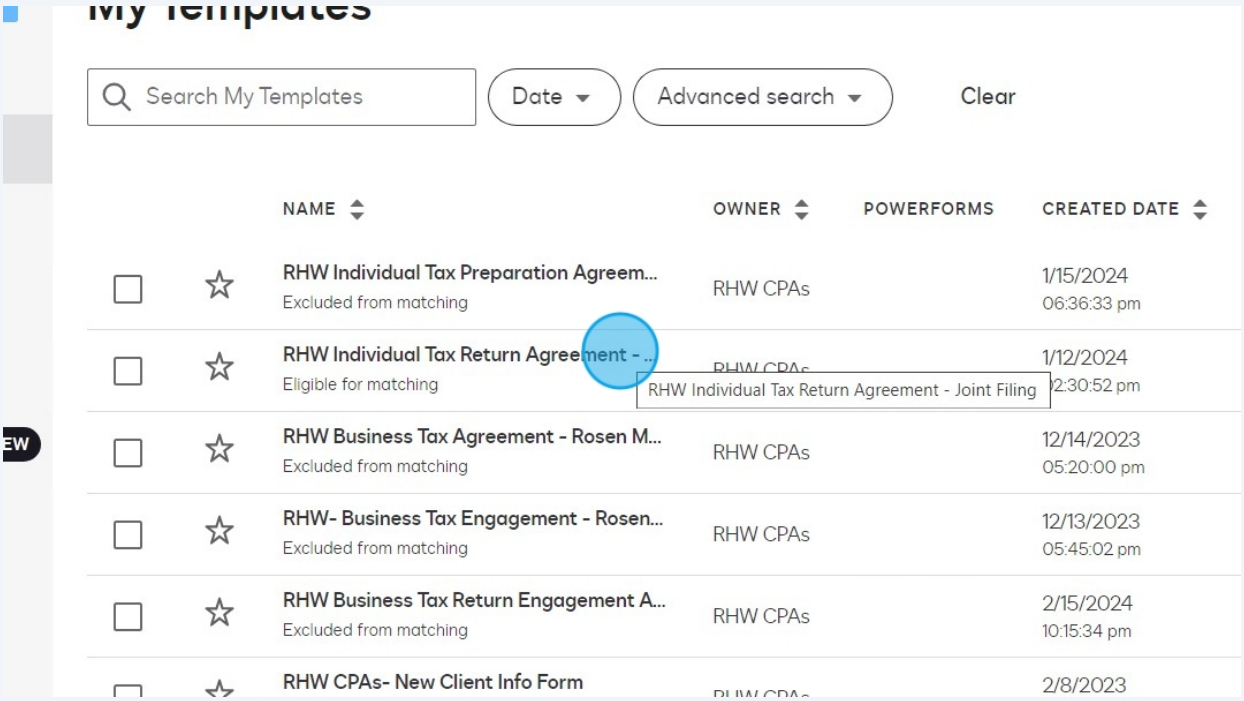
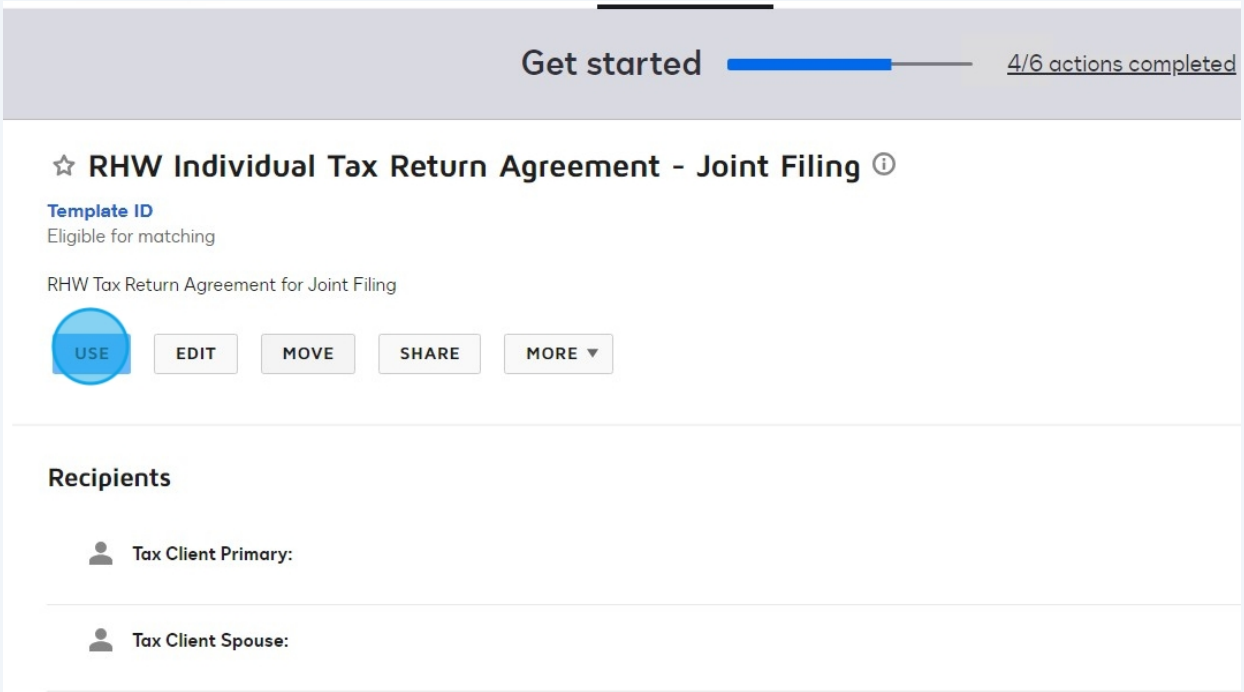
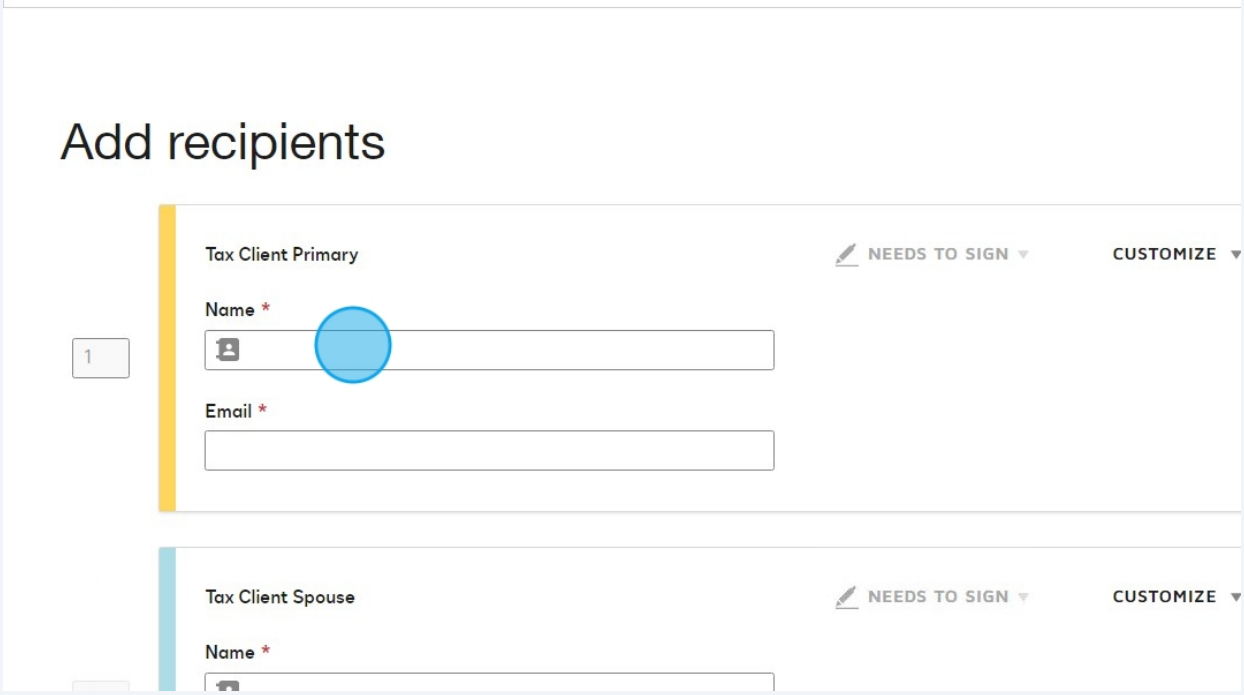
The Tax Return & Service Engagement Templates have pre-fillable New Client Info Sheet.
The New Client Info Sheet must be sent with every New Client Engagement.



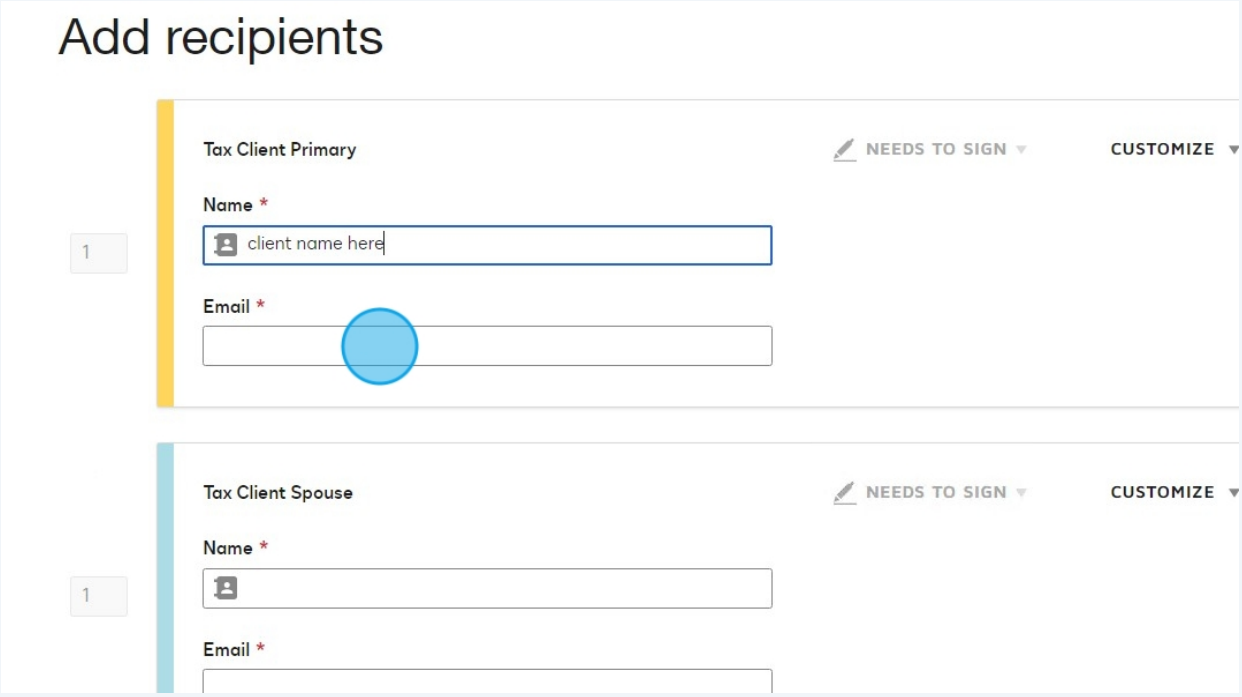
4 Click "USE"



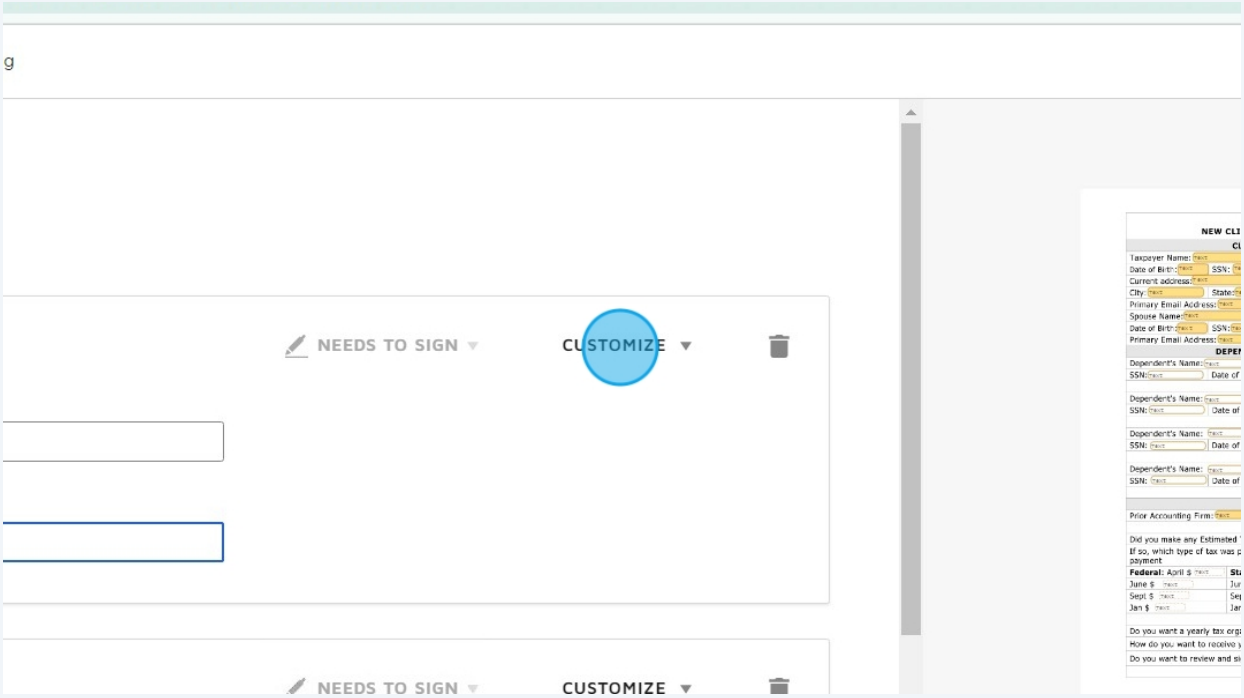
5 Enter the Primary Tax Client Name and Email.
If there is a Spouse or Second Signee, add their Name and Email address



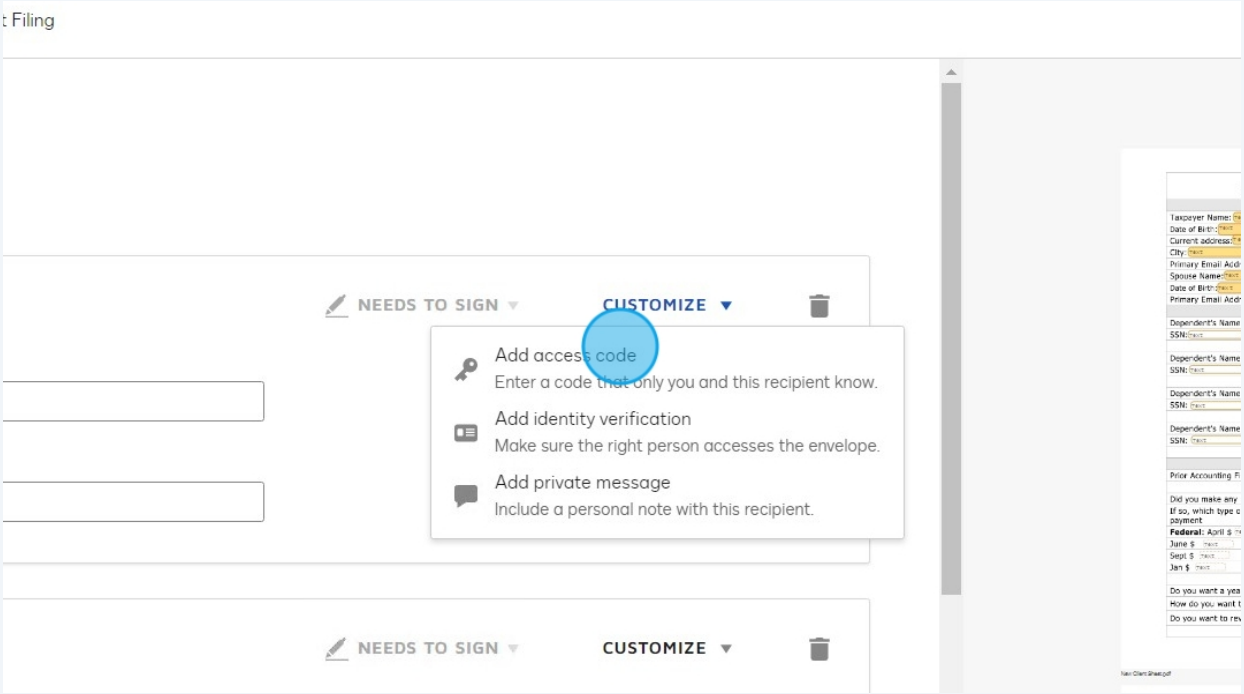
6 Primary's Email address



7 The document must have an Access code added to all Signee's. They are providing client sensitive information in the New Client Sheet.
Click "Customize"



8 Click "Add access code"



9 Enter an access code.

Make sure to send this access code in a separate email to the client. Should be added when you let the client know to expect the DocuSign.

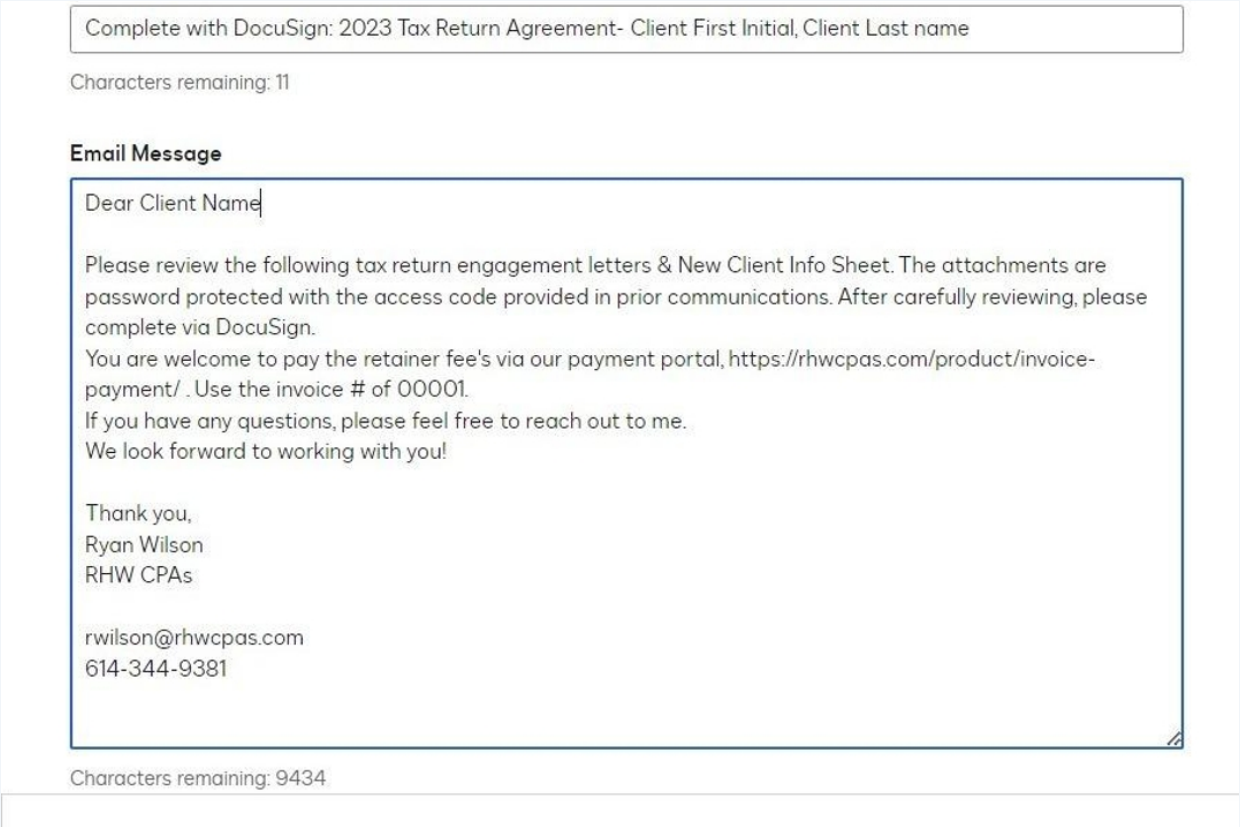
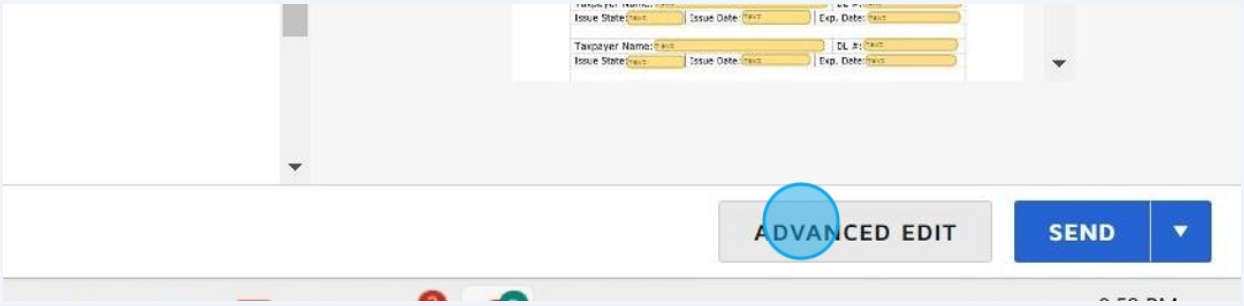
If they are not paying a retainer, remove the link.
If you are attaching anything else to the DocuSign besides the engagement letter, make note in the opening sentence.

Make sure to replace the closing with your name, email and office contact number.



14 Once you have completed the body of your email, click "Advanced Edit" to add additional documents.



15 The Screen will change to "Add Documents". The pre loaded New Client Info Sheet will already be there.

If you are preparing a Business Monthly/Qrterly Service Engagement, an ACH form must be included with their DocuSign.

Every box that is Solid Blue indicates that the Secondary Signee is required to complete. If the outline of the box is blue, the secondary can fill it in, but isn't required.
You may alter what boxes you want the to be required or optional. However, what is already set-up is the minimum requirement that we need for onboarding.
