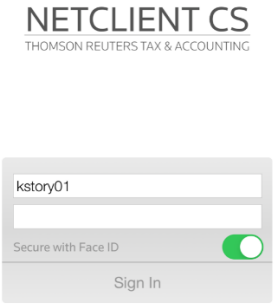
New Thomson Reuters Authenticator setup

For setting up the new Thomson Reuters Auth App to your Netclient portal

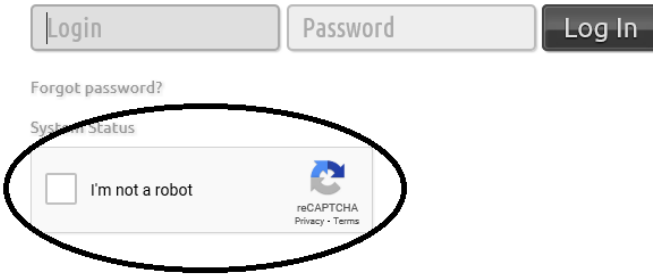
1. On a computer, Login into Portal (https://secure.netlinksolution.com/nextgen/?firm=588406)



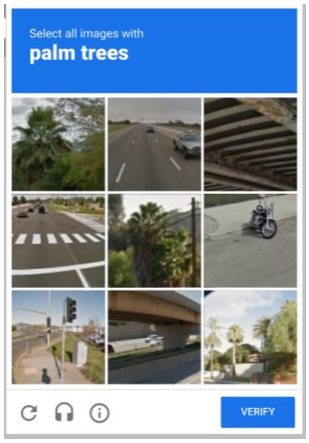
a. If you cannot remember your password, select “Forgot Password” and the system will generate an email with a temporary password for you.

2. Once you have input your login and password, you will click on

“I am not a robot “



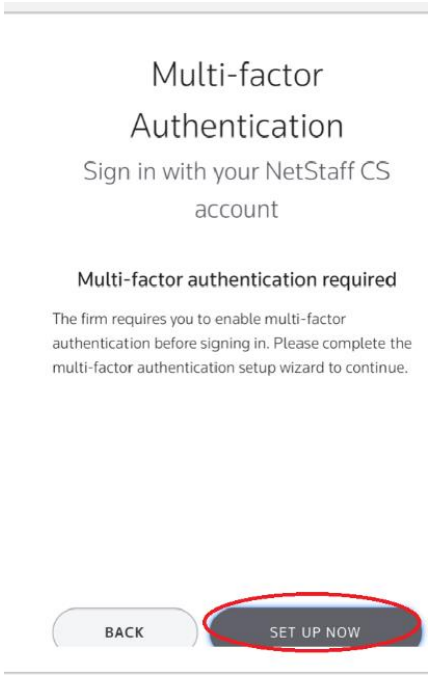
a. The system may ask you to select all images:



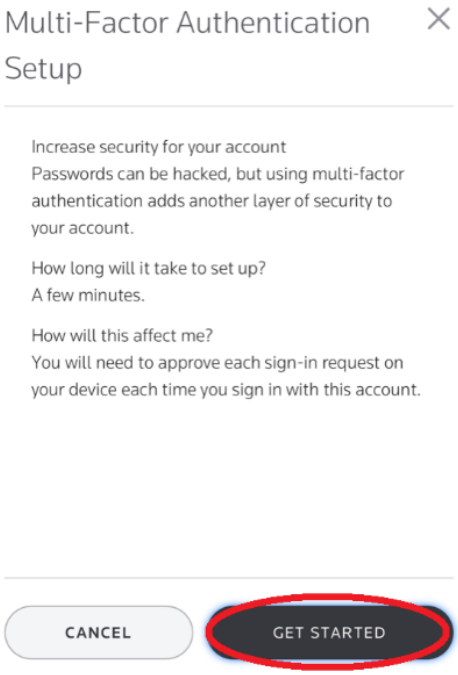
b. Once you have selected the requested images and click the "VERIFY" button.

3. The system will prompt you to set up the Multi Factor Authenticator

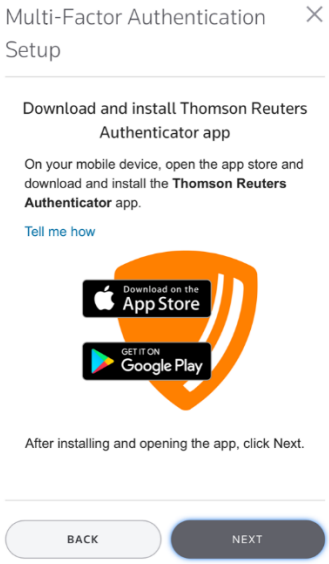
a. Click on "SET UP NOW"

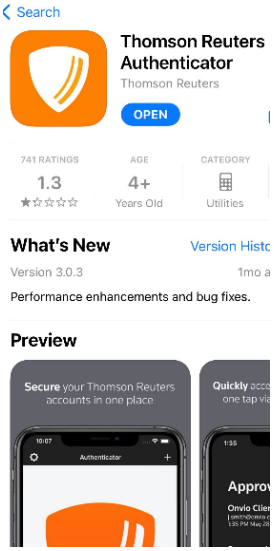


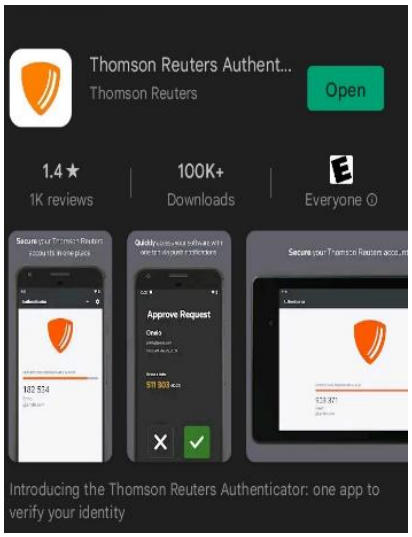
b. Click "GET STARTED"



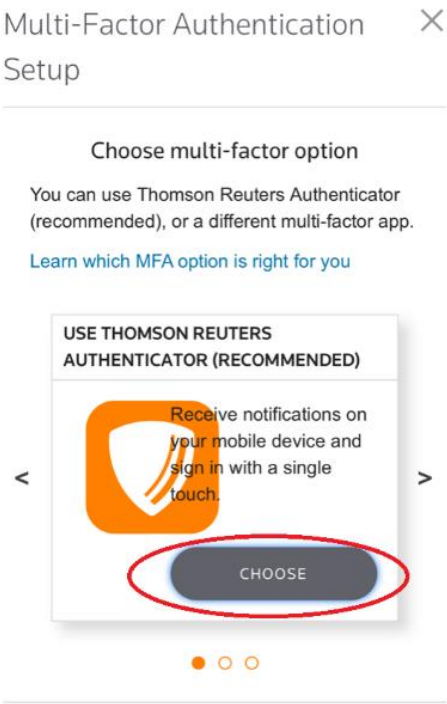
4. You now need to download the app from either the App Store (iSO) or your Google Play Store (Android). Make sure to allow the app access to your camera and to send you notifications.



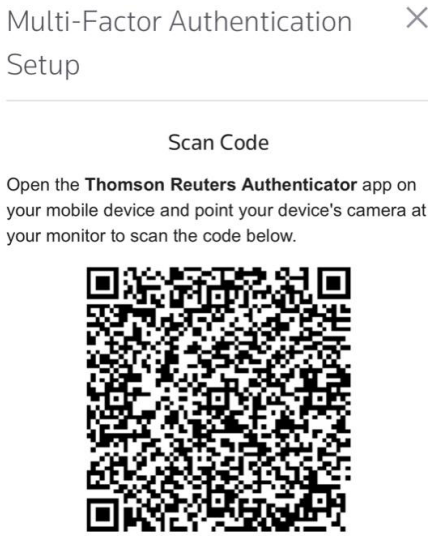




5. Once you have downloaded the app, you will open the app and Select "Choose":



6. A QR Code will show up on your **DESK TOP SCREEN**

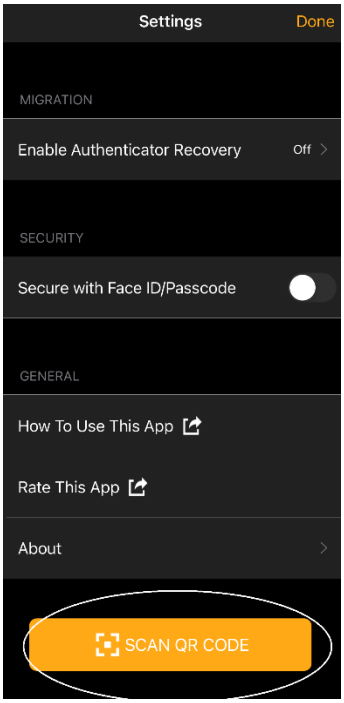


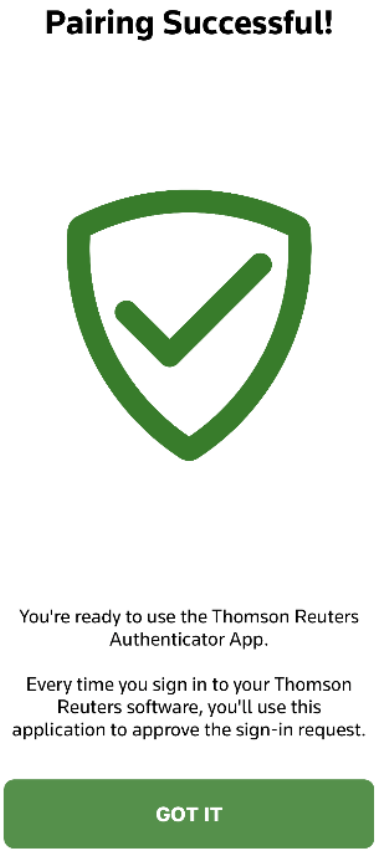
7. Scan the QR Code with the Thomson Reuters Multi Factor Authenticator.

a. Open the camera via the app by selecting "+" symbol or "settings"

i. If you select "+", the app will open your camera to scan the QR Code.

ii. If you select "settings" , Select "SCAN QR CODE"





8. This will link you app to your account,
